DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 85, 90, and 94 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 85, 90, lines 3-4, 8-9 and claim 94, lines 4-9; the first and second incident angles are not defined. The incident angle is formed with respect to what plane (normal, or horizontal surface of the object).

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 85-95 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-11 of prior U.S. Patent No. 6,618,134 (Vaez-Iravani et al). This is a double patenting rejection.

Since it is not clear about the first and second incidence angles as mentioned above, it is assumed that the incidence angles are relative to a direction normal to the

Art Unit: 2877

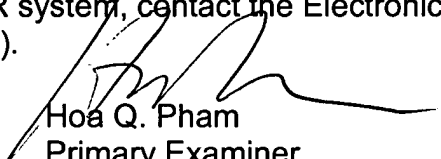

surface. Thus, claims 85-95 of the present invention is identical to claims 1-11 of the Patent.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Following references are relative to the present invention: Vaez-Iravani et al (6,657,715; 6,639,662; 6,384,910; 5,798,829; 6,538,730; US 2004/0057045; US 2003/0210393; US 2003/0206295; US 2001/0052975).
